

To whom it may concern:

Please allow XM Radio to continue its superior traffic and weather service, and reject petition 04-160. The quality of my life has definitely improved with the advent of this service. The vairyety of programming along with the depth of information provided is way superior to anything that I can find on the standard airwaves. I believe the complaints from "local" broadcasters will only encourage the inferior service that we have been recieving in the past. Its time to embrace the positive changes that have been in place since XM has been on the scene.

Thank you.

Steve Mink
